Telemetry and datasets
Questions
Protocol per phase
Network flows
DEDALE, Unraveled (dev)
OpTC Zeek (test)
Host provenance
ATLASv2, CARBANAKv2 (dev)
OpTC h501/h051/h201 (test)
DARPA TC E3: CADETS,
THEIA,
CLEARSCOPE (test)
Authentication
LANL days 2–12 (dev), 13–30
(test)
RQ1 per-host vs. pooled
label-free detection
RQ3 explaining alerts
as ATT&CK stages
RQ2 ATT&CK rule prior +
learned detector (Velox)
RQ4 next compromised host
(blast radius)
each
phase
1. plan, metrics and pass/fail
gate committed
2. development on dev data,
every round logged
3. code frozen, one test run
4. report against the gate;
seeds and controls after
